OIT's goal is to accelerate research, development, demonstration and commercialization of energy efficient, renewable and pollution-prevention technologies benefiting industry, the environment, and U.S. energy security.

The key objectives of this solicitation and the resulting projects are improvements of the competitive position of, and employment opportunities in, the U.S. chemical

industry. These objectives are intended to be achieved through several avenues, such as the development of improved technologies and better application of existing technologies. As a result of this solicitation, DOE expects to award six (6) to twenty (20) cooperative agreements with an anticipated \$4 million in total funding for FY 98. DOE will consider projects ranging from one (1) to five (5) years.
